2026/2027	Forsyth County Schools High School (AP/IB) Course Syllabus AP Computer Science A FCHS

Teacher Information

Teacher Name: Daphne John

Contact Information: dajohn@forsyth.k12.ga.us

Availability for Extra Help: During dawg time every week

Materials Needed: 1 Notebook

Course Information

Course Description:	CED from College Board
Course Standards:	Please look at the standards in the above link
Course Text(s) and Resources:	

Projected Course Timeline		
Unit	**Approximate Timeline**	**Major Assignments**
Semester 1		
1 - Using Objects and Methods	**9 weeks**	**2 Summative**
2 - Selection and Iteration	**5 weeks**	**Summative**
3 - Class creation	**2 weeks**	**Summative**
4 - Arrays	**2 weeks**	**Summative**
Semester 2		
5 - 2D Array	**4 weeks**	**Summative**
6 - ArrayList	**4 weeks**	**Summative**
7 - Datasets, searching, sorting	**5 weeks**	Summative

Employability Skills: Standard 1

Standard 1 across all CTAE courses focuses on demonstrating the employability skills valued by business and industry. This encompasses effective communication, creativity, critical thinking, and problem-solving abilities. It also involves displaying work readiness traits essential for workplace success and using the necessary skills to contribute productively on the job. Additionally, Standard 1 highlights the importance of maintaining a professional image through appropriate appearance, behavior, and language.

Career Technical Student Organization (CTSO)

Career Technical Student Organizations or CTSOs are co-curricular organizations with leadership programs and competitive events which reflect current curriculum standards and competencies for the instructional programs they serve. Teachers infuse CTSO activities into the instructional activities, thereby helping students see the real-world value of their academic studies. The CTSO for this course appears below, and students are encouraged to take advantage of these additional leadership opportunities.

FBLA: The mission of the Future Business Leaders of America (FBLA) is to inspire and prepare students to become community-minded business leaders in a global society through relevant career preparation and leadership experiences

TSA: The Technology Student Association enhances personal development, leadership, and career opportunities in STEM, whereby members apply and integrate these concepts through intracurricular activities, competitions, and related programs.

Dress for Success

Dress for Success: Career and technical education pathways in Forsyth County incorporate Dress for Success Days throughout the school year. These experiences allow students to foster confidence and continue to develop a positive self-image, while understanding the importance of dressing well for their future profession. At certain intervals throughout the course, students will analyze industry standards of the profession and study the importance of dressing well for a job interview. This will culminate in being fully prepared for Community Mock Interviews which occur as students complete a career pathway.

End of Pathway Assessment/Credentials of Value

Students are encouraged to choose a career pathway in 9th or 10th grade that aligns with their college and career goals. This course is part of a three-course sequence that concludes with a nationally recognized online industry credentialing assessment. This exam allows students to demonstrate the skills they've learned and may lead to earning a FCS Pathway Medallion and State Career Pathway Diploma Seals upon graduation. Student directory information may be shared with credentialing vendors offering the assessment. The technical coursework completed throughout the pathway provides the foundation needed for success on the exam, and teachers will share testing details, study guides, and other resources to support student preparation.

Assessment, Assignments, & Grading

Assessment Categories

- **Formative Assessments** include, but are not limited to, homework, class work, labs, investigations, practice tests, rough drafts, and sections of projects/research papers/presentations.
- **Summative Assessments** include, but are not limited to, unit tests, final projects, final essays, formal lab reports, final research papers, and final presentations.

Supervised Agricultural Experience Project

All agriculture students are required to complete a yearlong Supervised Agricultural Experience (SAE) project. Details of this project will be provided by the agriculture teacher to students.

Areas of SAE projects include:
Foundational - Explore Ag careers by attending a career fair or creating a report.
Research - Plan and conduct a scientific experiment.
Entrepreneurship - Own and operate an agricultural business.
Placement - Get a job at an ag-based business, in a school or lab.

A = 90-100 **B = 80-89** **C = 70-79** **F = 0-69**	Formative = 25% + Summative = 75% *(midterm and final exam multiplier = 1)*	50% (Semester 1) + 50% (Semester 2) = Course Average

Make-up Work

Make-up work is defined as work assigned during a student's absence, not work assigned prior to an absence. Students who are absent from school have five (5) school days upon returning to school to complete makeup work. The teacher has discretion to grant a longer period of time to make up the work if there are extenuating circumstances.

Summative Reassessment

To support continued learning, students may engage in one summative reassessment opportunity per semester per course.

Procedures:

- All formative assessments must be complete before a student takes a corresponding summative reassessment.
- The student must engage in re-teaching activities prior to the summative reassessment.
- The teacher collaborative team can determine one of two methods for reassessment:
  - Engage the student in re-teaching activities and reassess the standards.
  - Engage the student in re-teaching activities and use the midterm or final exam to reassess the aligned standards.
- To ensure accuracy in grading and reporting practices, full credit is applied to all reassessments.
- When a student does not show minimal proficiency of standards on multiple summative assessments, a multi-tiered system of supports will be put in place to assist the student in reaching proficiency.

Student Responsibilities

Academic Integrity

It is the expectation of Forsyth County Schools that students exhibit academic integrity when submitting evidence of learning. When students submit evidence that does not authentically represent what they know and can do, the evidence is rendered invalid. Examples of academic dishonesty are outlined in both the Family Engagement Guide & Student Handbook and The Forsyth County Schools Code of Conduct. Depending on the severity of the situation, academic dishonesty/cheating may result in the loss of credit, completing an alternative assignment and/or disciplinary consequences up to a tribunal referral.

Consequences for High School Students:

- First Offense: Parent contact + academic integrity contract + take a different assessment with a maximum assessment score of up to 60%
- Second Offense: Parent contact + loss of credit up to 100% + removal from honor clubs/societies + possible in-school suspension or out-of-school suspension
- Third Offense: Parent conference + loss of credit up to 100% + possible out-of-school suspension
- Academic Integrity offenses will not reset each school year. For example: If a student has an academic integrity offense during 9th grade and another one in 10th grade, the offense in 10th grade would be considered their second overall offense.
- Standardized Assessments: Any suspicion or instances of cheating on standardized tests will be reported to the governing agency and, based on the severity of the behavior, will receive disciplinary consequences.

- Severe Offenses: Should a student engage in behavior that compromises the integrity of an assessment (i.e., theft of assessment, pictures/dissemination of content, etc.), immediate and more severe consequences (up to a disciplinary tribunal) may be applied.

**Students who face consequences for submitting work that does not reflect their own knowledge and skills may only reassess in accordance with the FCS Academic Integrity Consequences for High School Students outlined above.*

Responsible Use of Artificial Intelligence

Artificial Intelligence refers to computer systems that are trained with data to accomplish tasks normally requiring human intelligence. AI is used across industries and communities and can serve as a helpful tool in educational settings. Students should learn how to evaluate if and when they should use AI and develop responsible and ethical practices when using AI tools. Students with Forsyth County Schools are expected to uphold the highest standards of academic integrity. This includes the responsible use of emerging technologies such as artificial intelligence.

Students will:

- Use approved age-appropriate AI tools for educational purposes only
- Follow teacher guidance on the use of AI tools
- Submit work that is fundamentally my own and provide proper citations when AI is used
- Evaluate the purpose, safety, and the trustworthiness of AI tools before use
- Review and critically assess output of AI tools recognizing that AI may contain bias and inaccuracies
- Not use AI tools to propagate harmful, misleading, offensive or inappropriate content

All members of Forsyth County Schools' community agree to follow the **Forsyth County Schools Code of Conduct**, school rules and commit to these responsible use guidelines.

AP resources

AP teachers utilize AP Classroom, the Bluebook digital testing application, and Total Registration as instructional and exam support tools. These services require account creation and, in some cases, parental consent. Parents or guardians who would like their student to use these resources should complete any required account setup and consent procedures directly with the service provider from home.
